# Database Dynamic Update Guide

Professor-Industry Matching System

# Step 1: Prepare Relevant Files

- 1. input.csv
- The format of input.csv is very easy. Only contain one column named `name`. Put all professors' name you want to newly add to the system database. Here is a sample format of input.csv.

| | A | B | C | D | E | F |
|---|---|---|---|---|---|---|
| 1 | name | | | | | |
| 2 | Kar Yan TAM | | | | | |
| 3 | Yung Hou WONG | | | | | |
| 4 | Yike GUO | | | | | |
| 5 | Nancy Yuk-Yu IP | | | | | |
| 6 | Sen YANG | | | | | |
| 7 | | | | | | |
| 8 | | | | | | |
| 9 | | | | | | |
| 10 | | | | | | |
| 11 | | | | | | |
| 12 | | | | | | |
| 13 | | | | | | |
| 14 | | | | | | |
| 15 | | | | | | |
| 16 | | | | | | |

# Step 1: Prepare Relevant Files

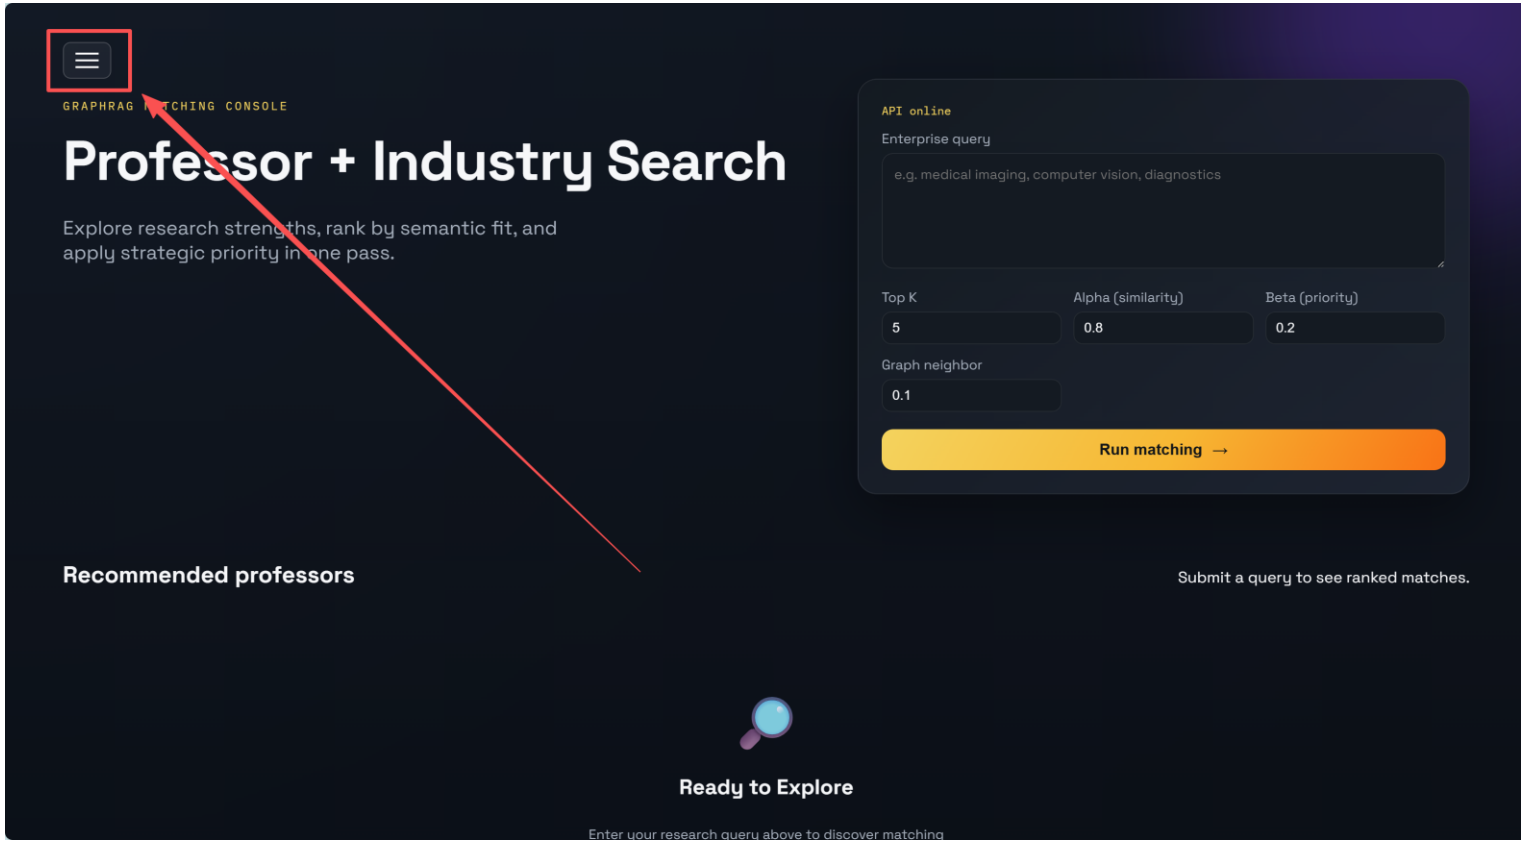
- 2. DeepTech Playbook Excel Version
- The format of DeepTech Excel headers must **strictly follow** the given following sample. Here is a standard example.

| OKT Tech cluster | Principal Investigator (PI) | Technology Title | Technology Readiness Level (TRL) | IP status | Technology Overview | Key Technology Edges | Potential Applications - 1st technology application | Potential Applications - 2nd technology application (if any) | Potential Applications - 3rd technology application (if any) | Potential Applications - 4th technology application (if any) | Applicable Industry - 1st industry | Applicable Industry - 2nd industry (if any) |
|---|---|---|---|---|---|---|---|---|---|---|---|---|

- Besides, the name of the Principal Investigator (PI) must **strictly follow** the faculty profile format. You can find the required form here: https://facultyprofiles.hkust.edu.hk/facultylisting.php
- More importantly, please rename your DeepTech Project Excel into the following format: `Category_{year}.xlsx` (e.g. BMH_2025.xlsx)

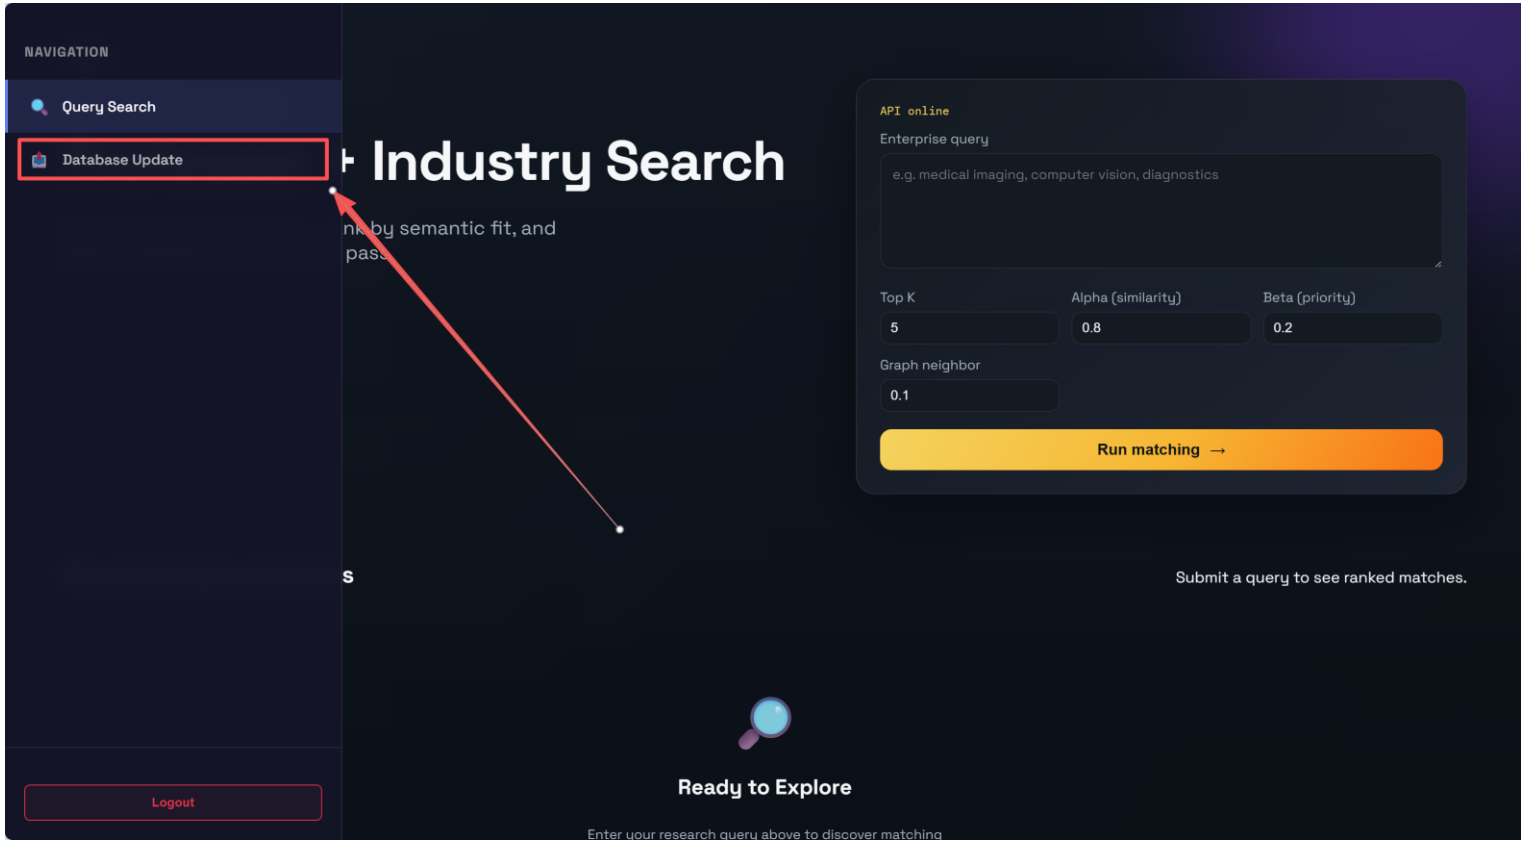
# Step 2: Open the Database Update Page

Enter our Professor-Matching System, click on the top left sidebar



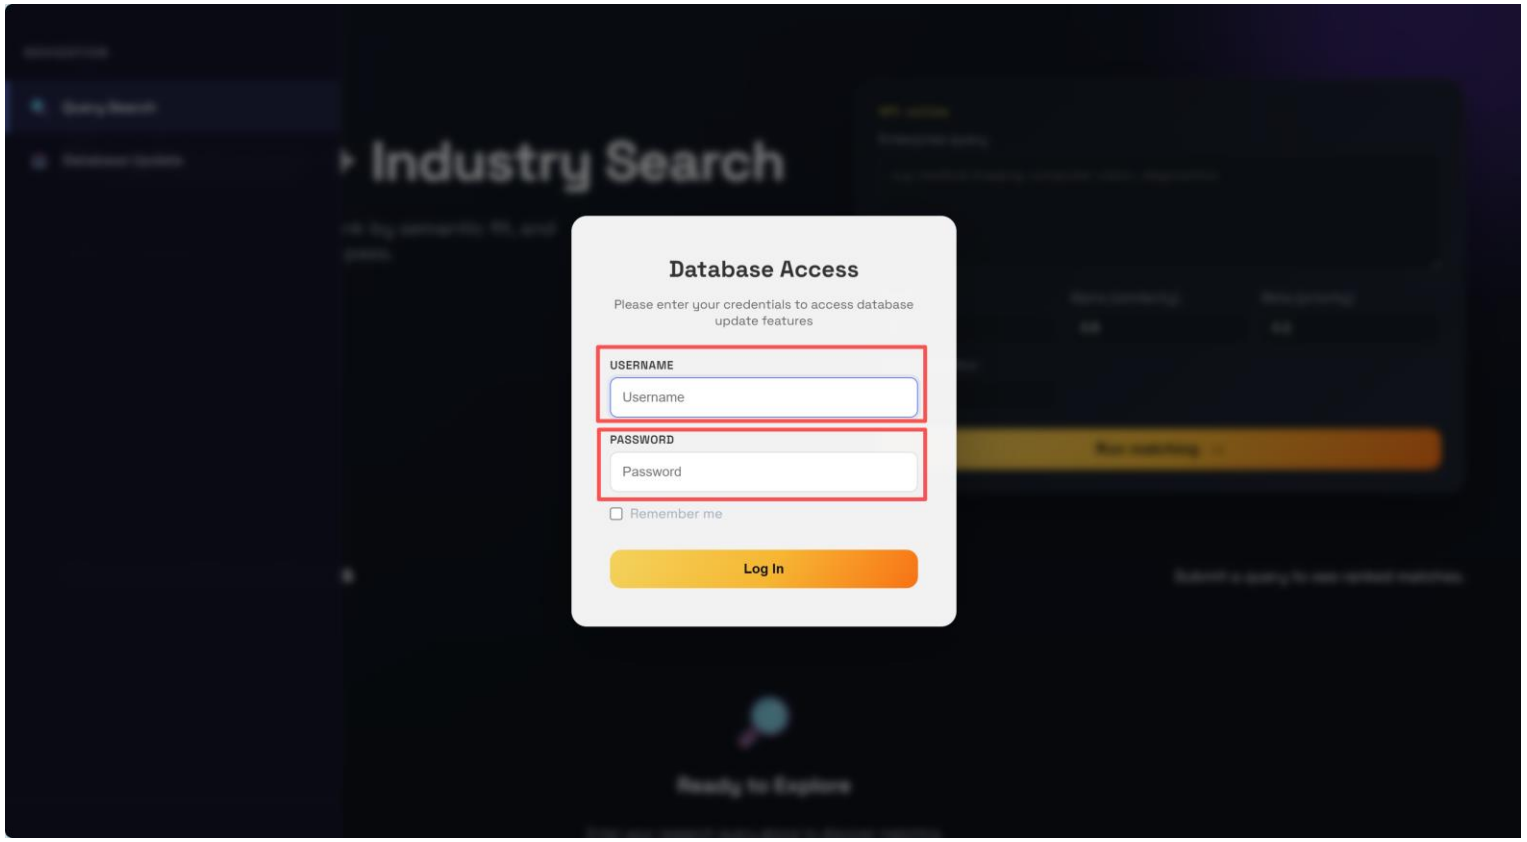
# Step 2: Open the Database Update Page

After opening the sidebar, click on the `Database Update` tabs



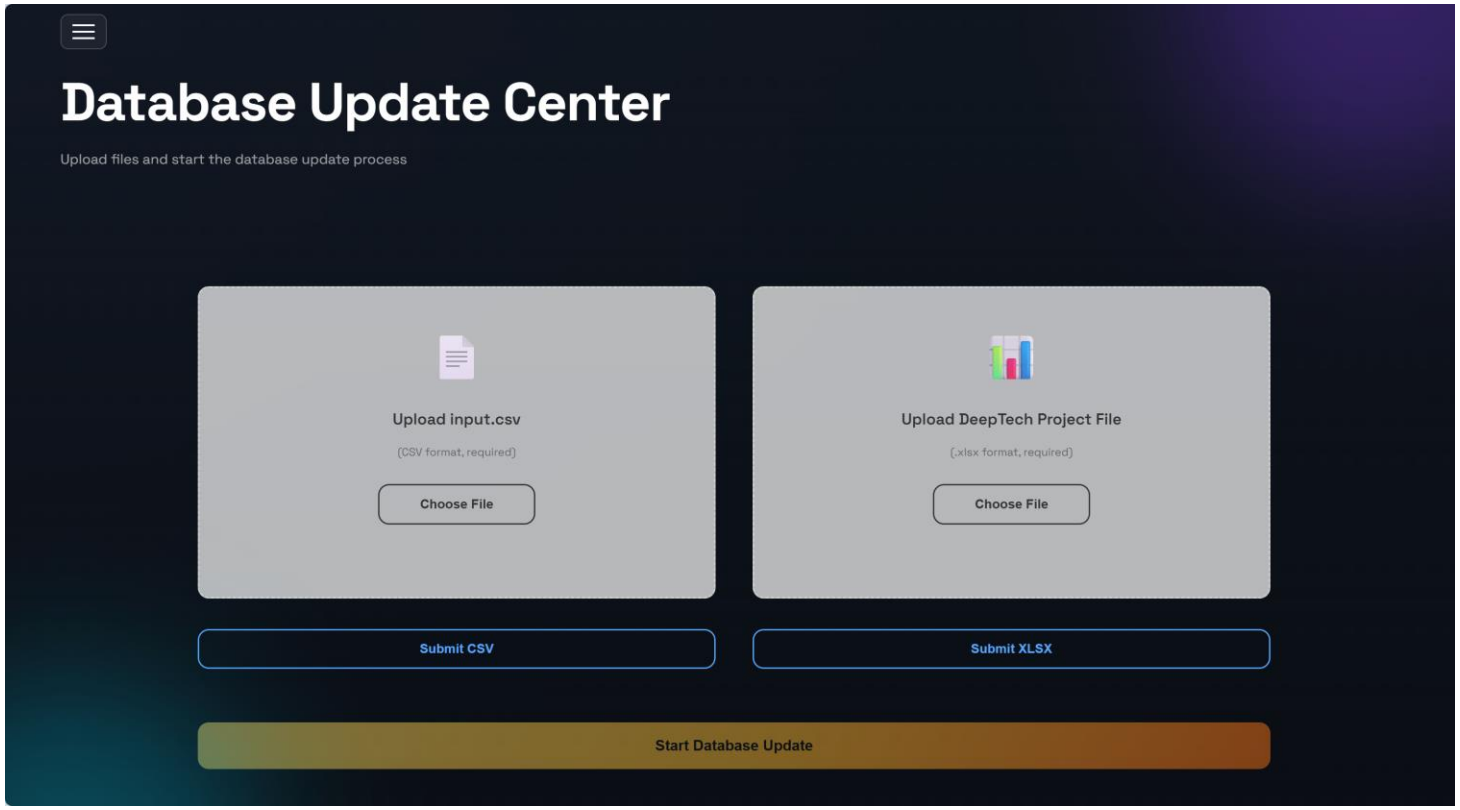
# Step 2: Open the Database Update Page

Enter your username and password to log in



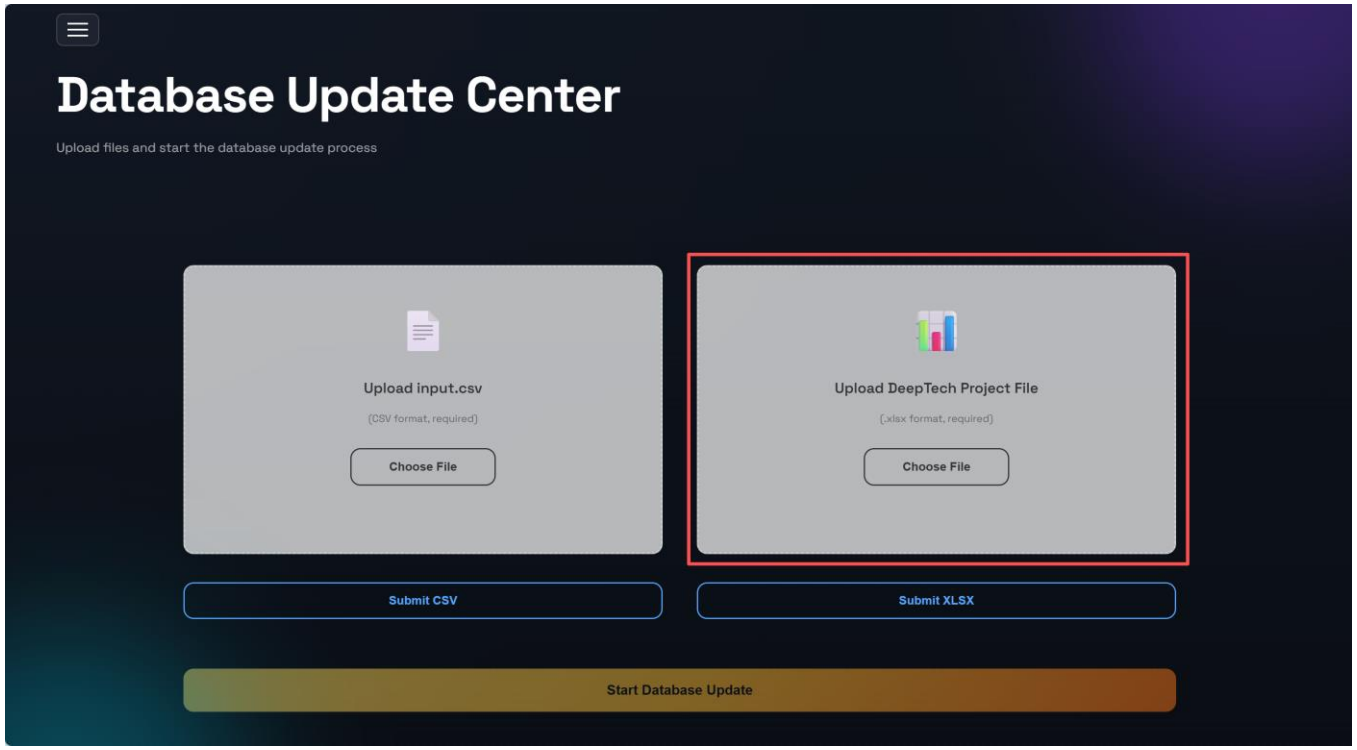
# Step 2: Open the Database Update Page

- After logging in, you can see the database update page



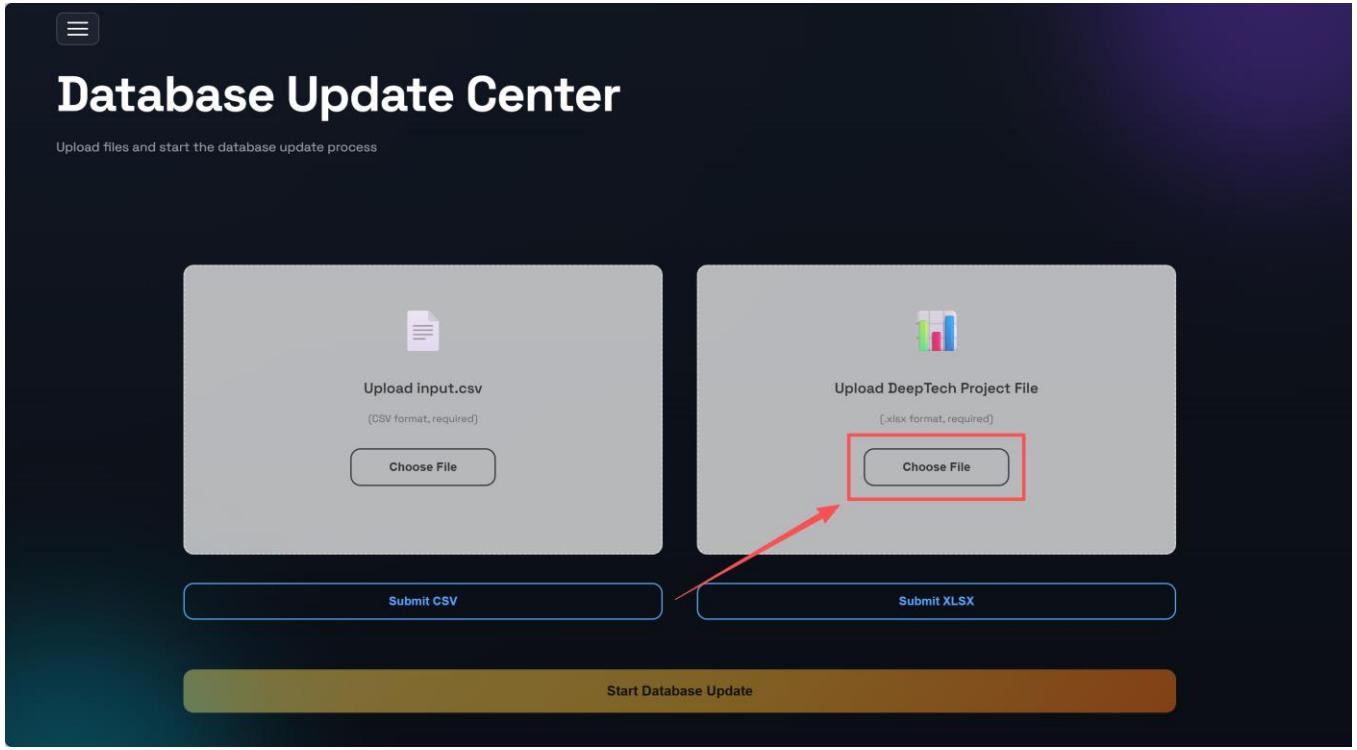
# Step 3: Upload DeepTech Excel

Method 1: Drag your DeepTech excel to the white area on the right



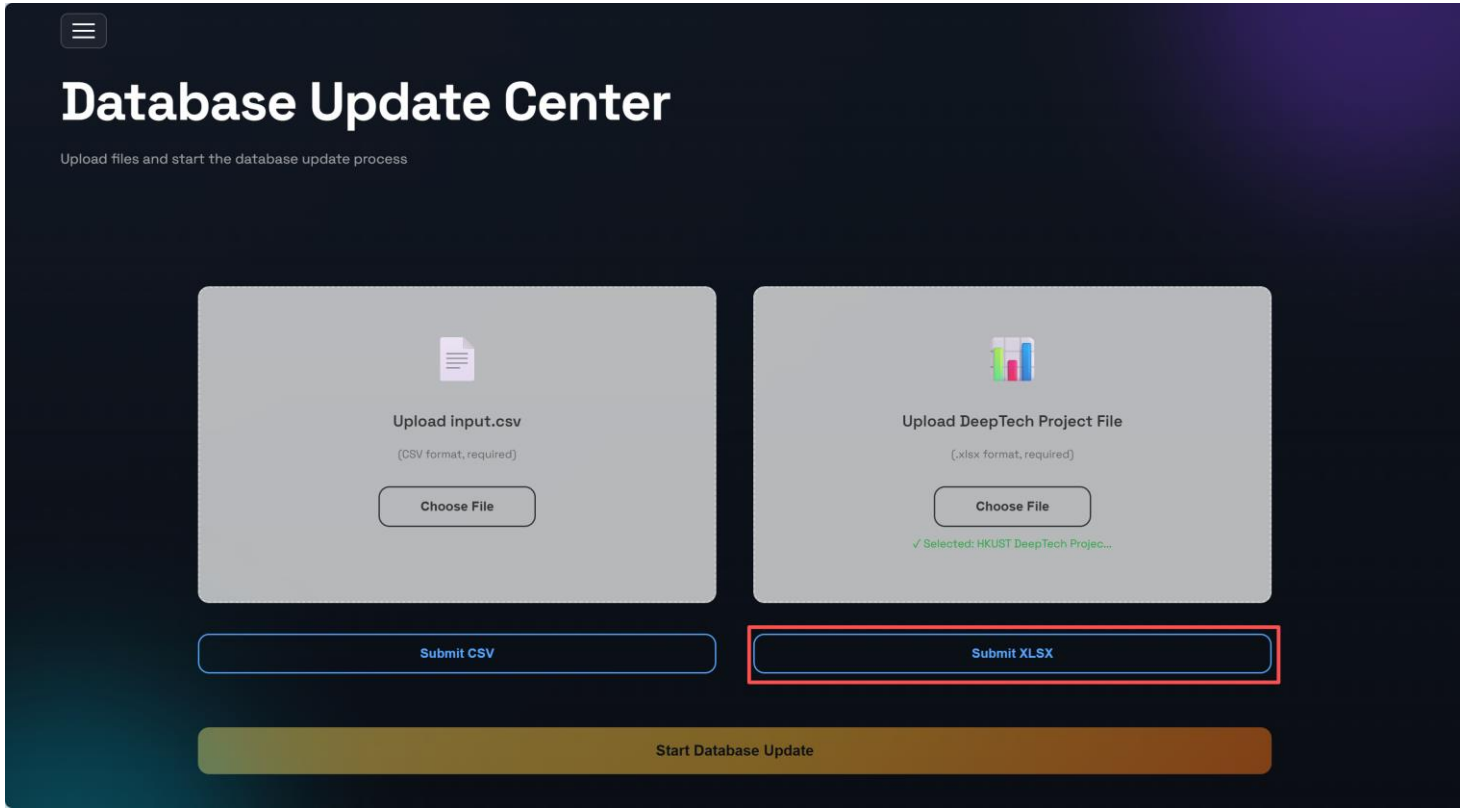
# Step 3: Upload DeepTech Excel

Method 2: Click `Choose File` button, and select the corresponding file from your local folder



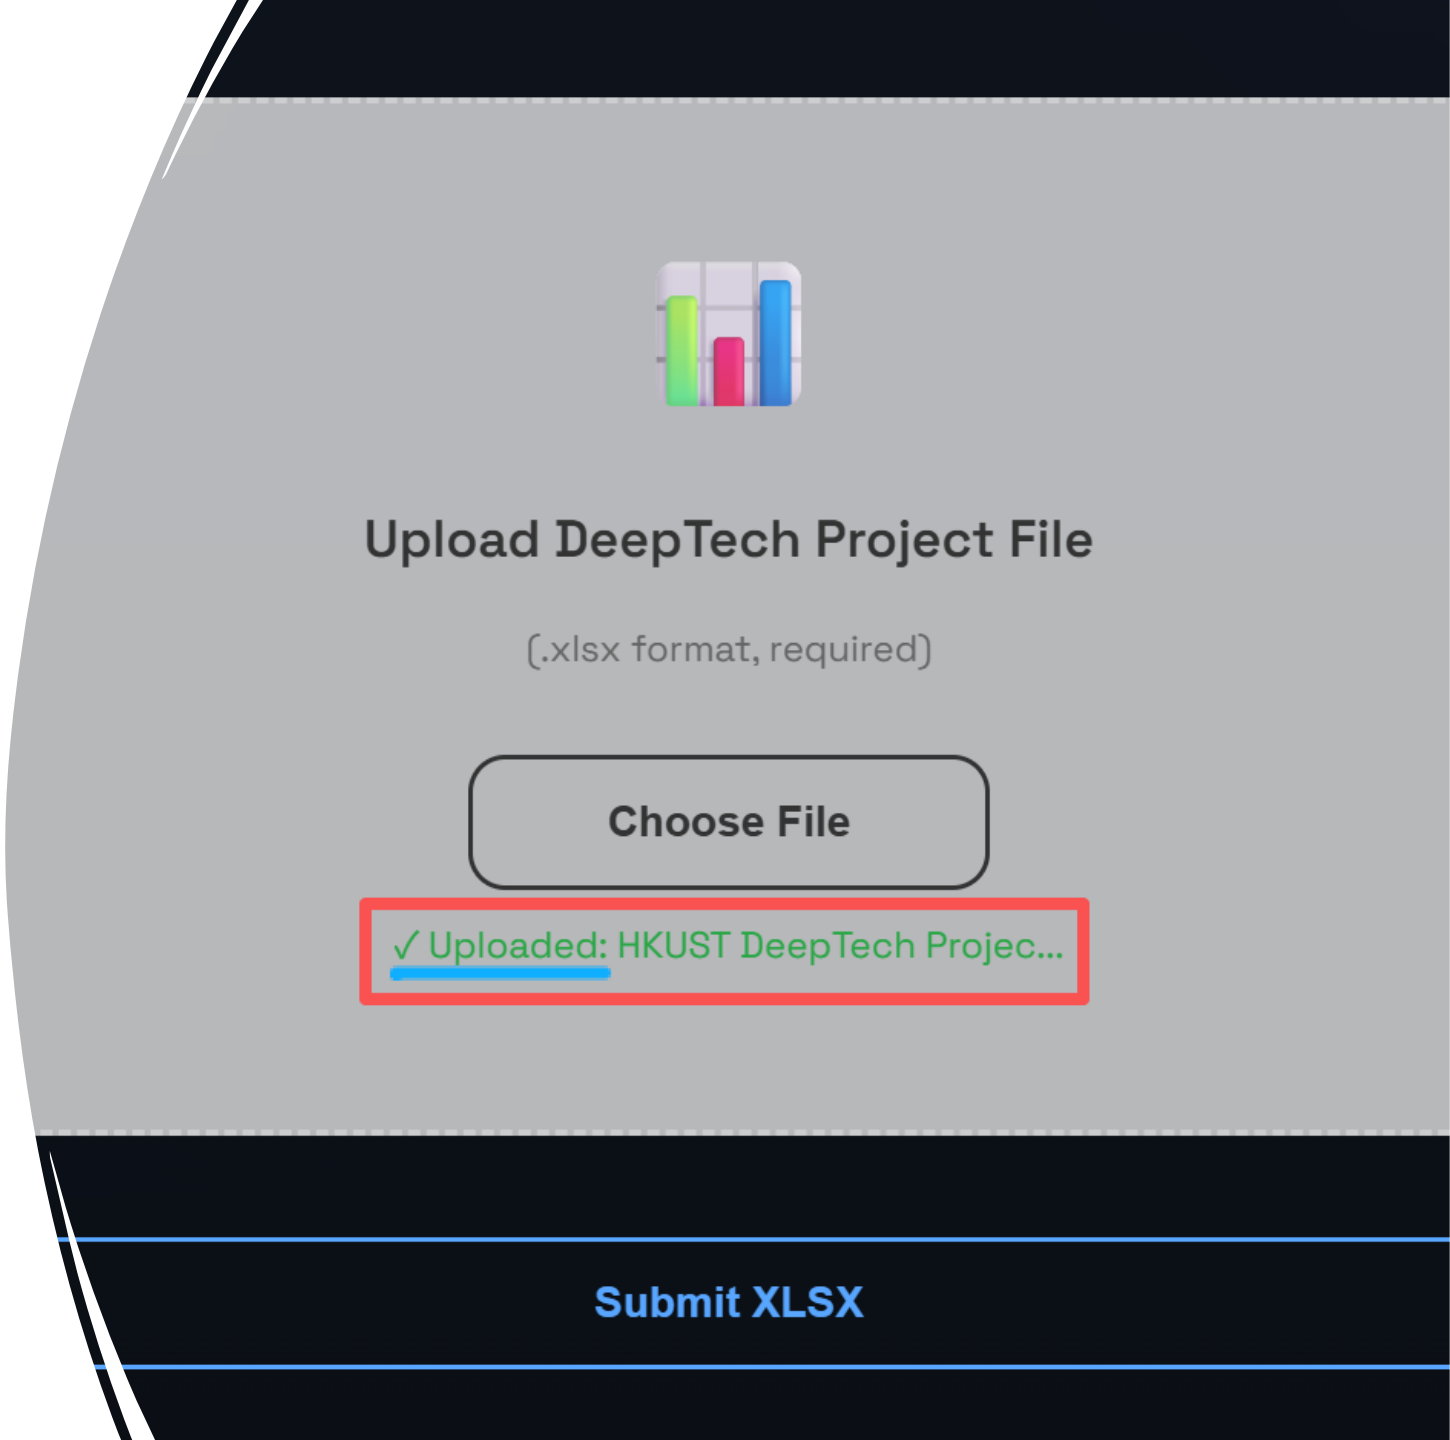
# Step 3: Upload DeepTech Excel

- After uploading the excel, click `Submit XLSX` button to transfer the excel from web cache to backend database

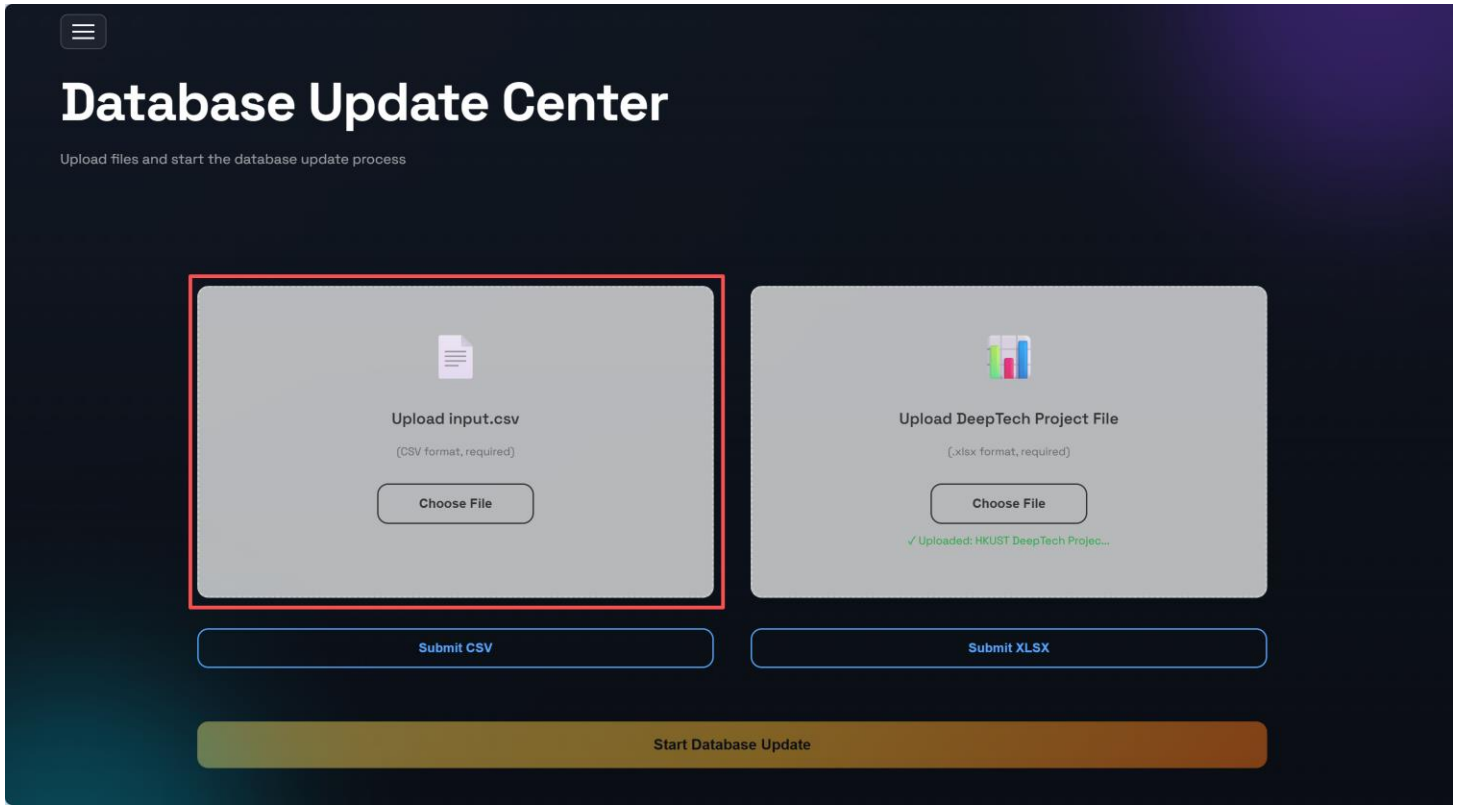


# Step 3: Upload DeepTech Excel

- If the excel has uploaded successfully, you can see the following output below the `Choose File` button

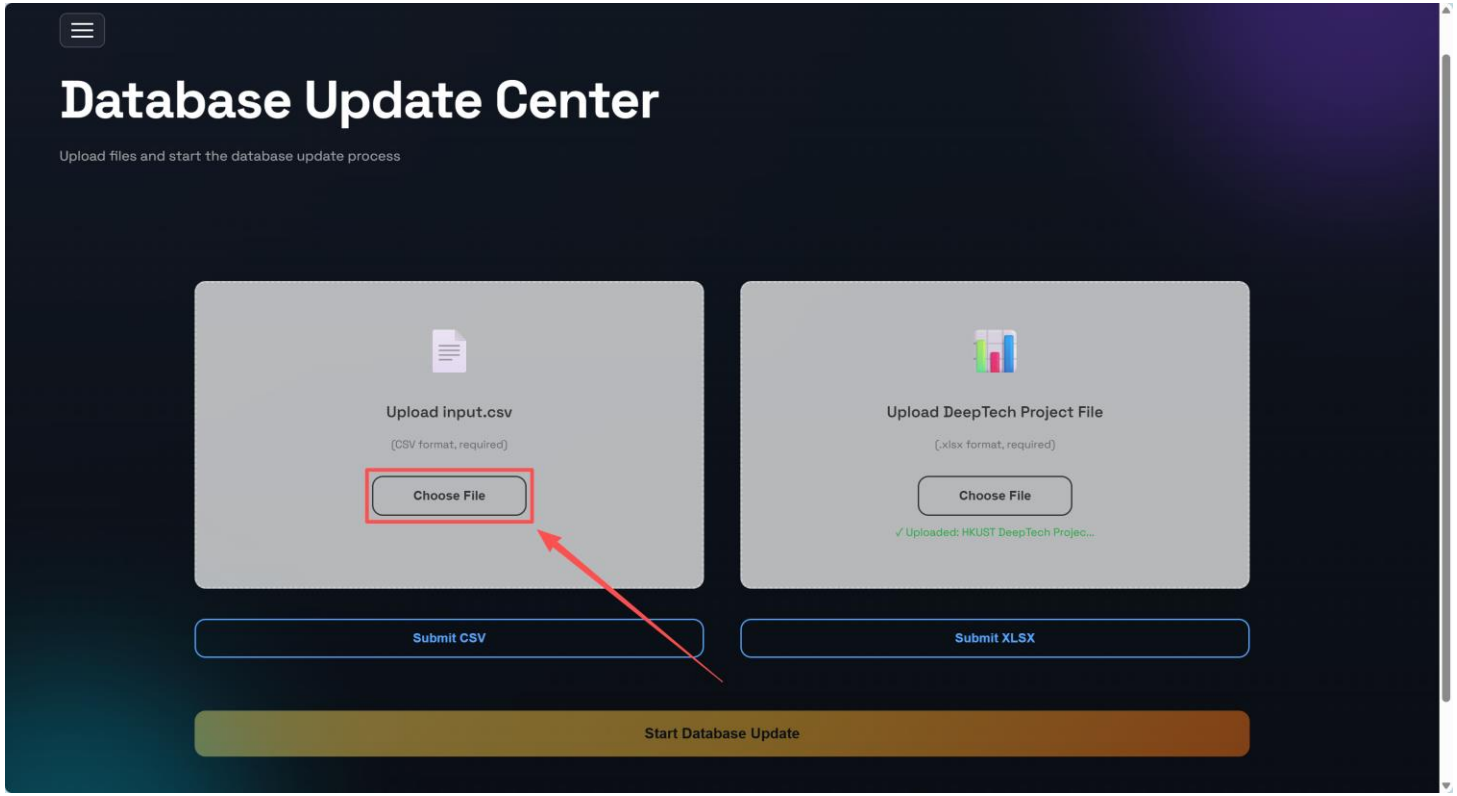


# Step 4: Upload input.csv



- Method 1: Drag your DeepTech excel to the white area on the left

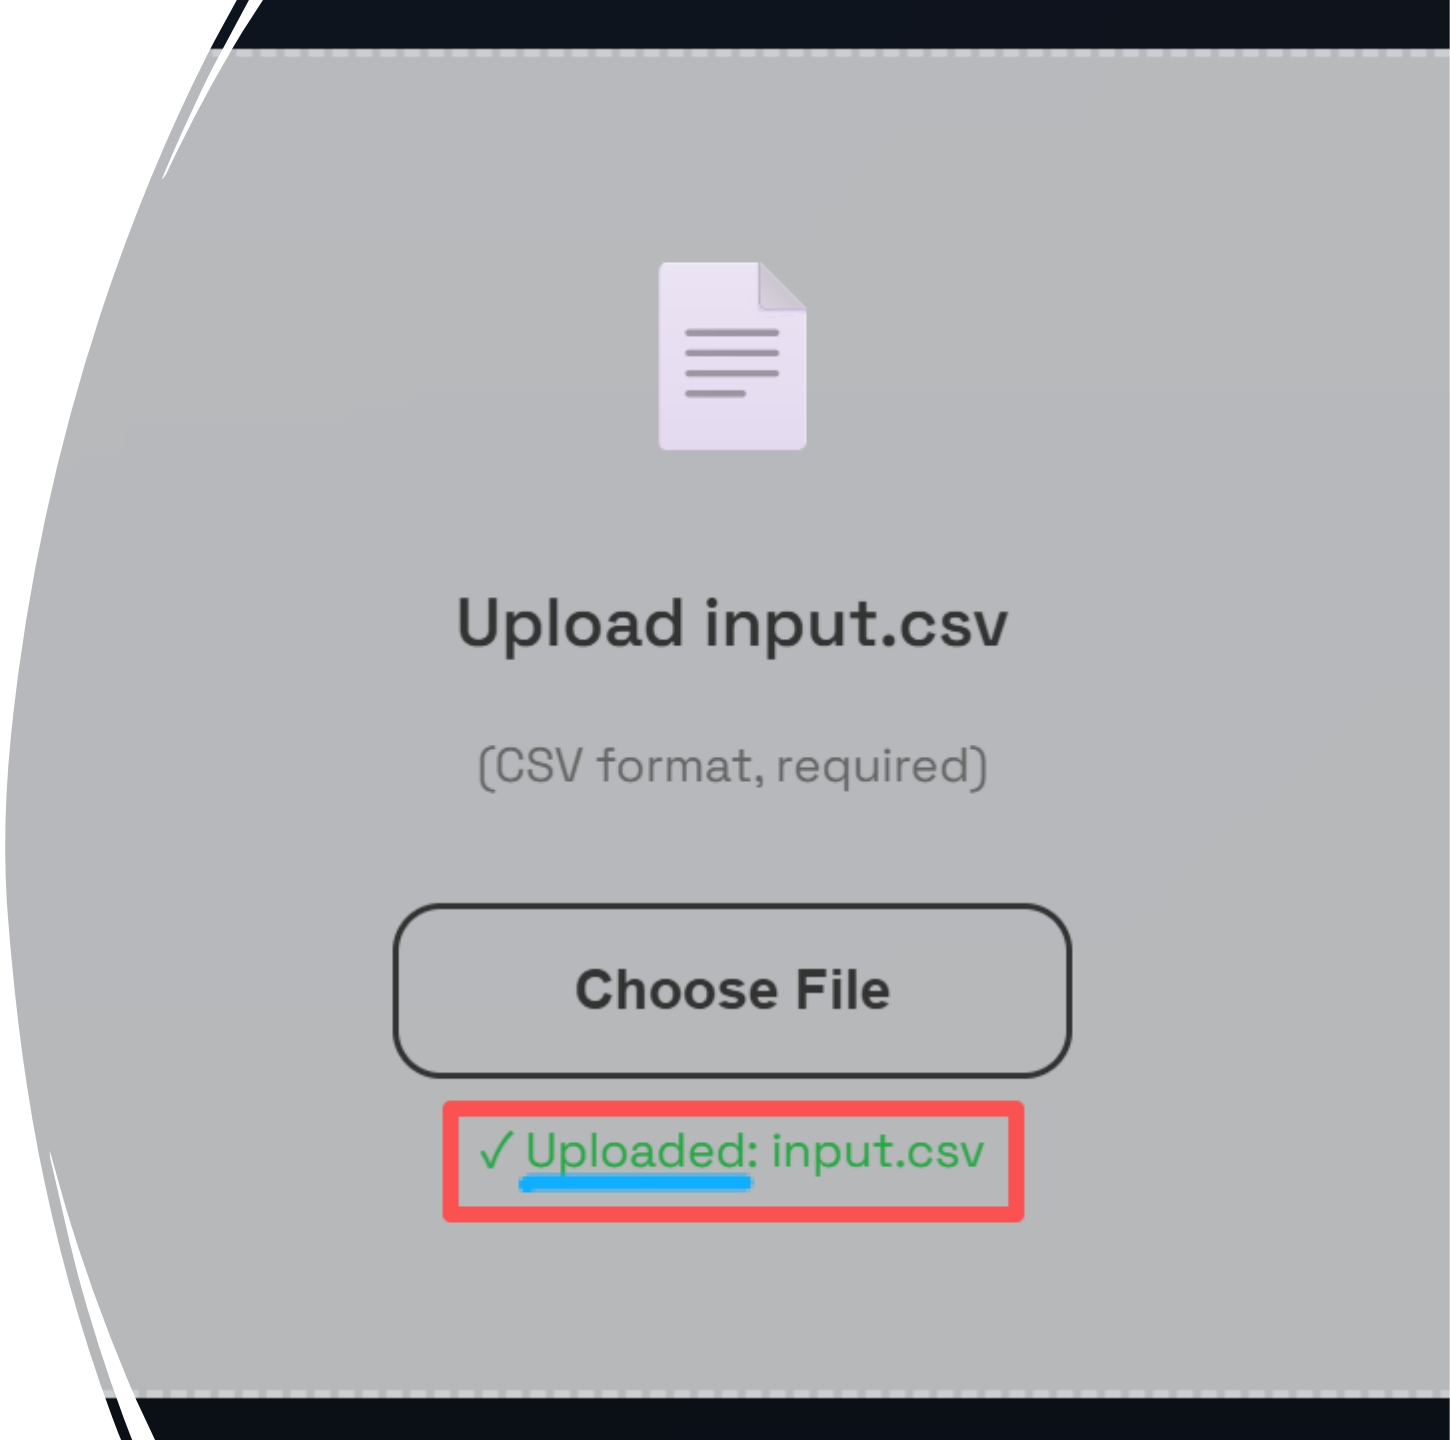
# Step 4: Upload input.csv



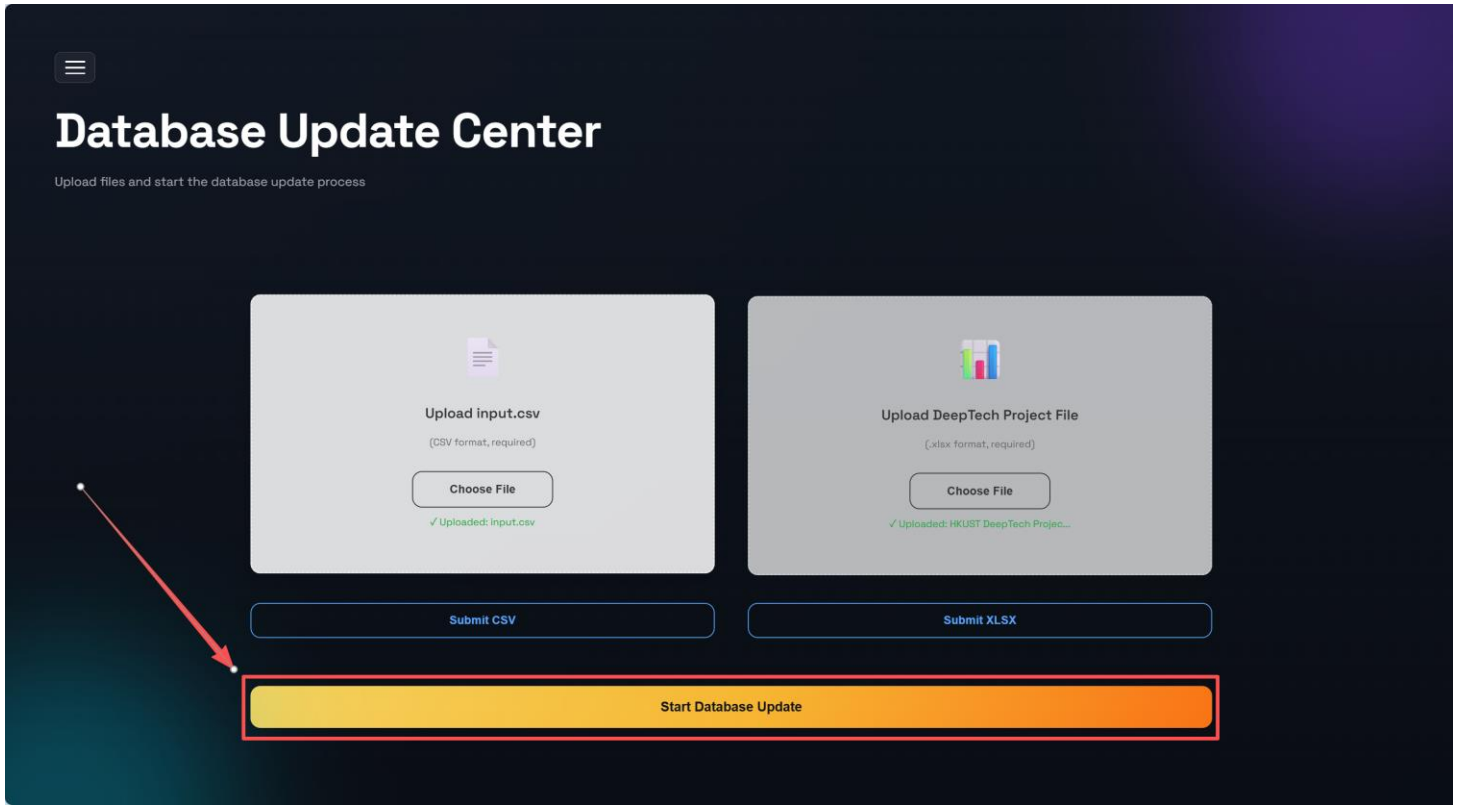
- Method 2: Click `Choose File` button, and select the corresponding file from your local folder

# Step 4: Upload input.csv

- If the csv has uploaded successfully, you can see the following output below the `Choose File` button

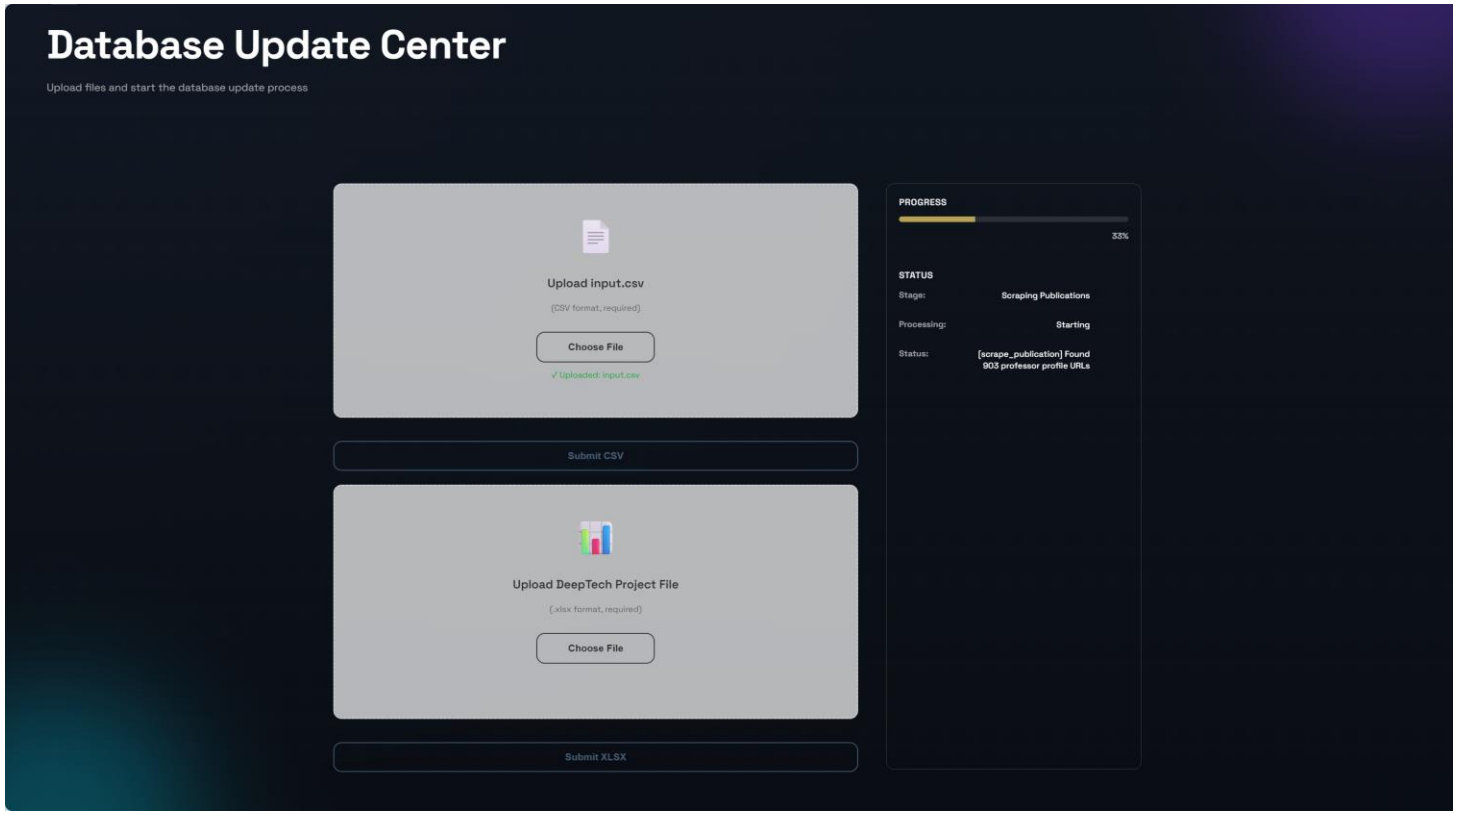


# Step 5: Update the Database



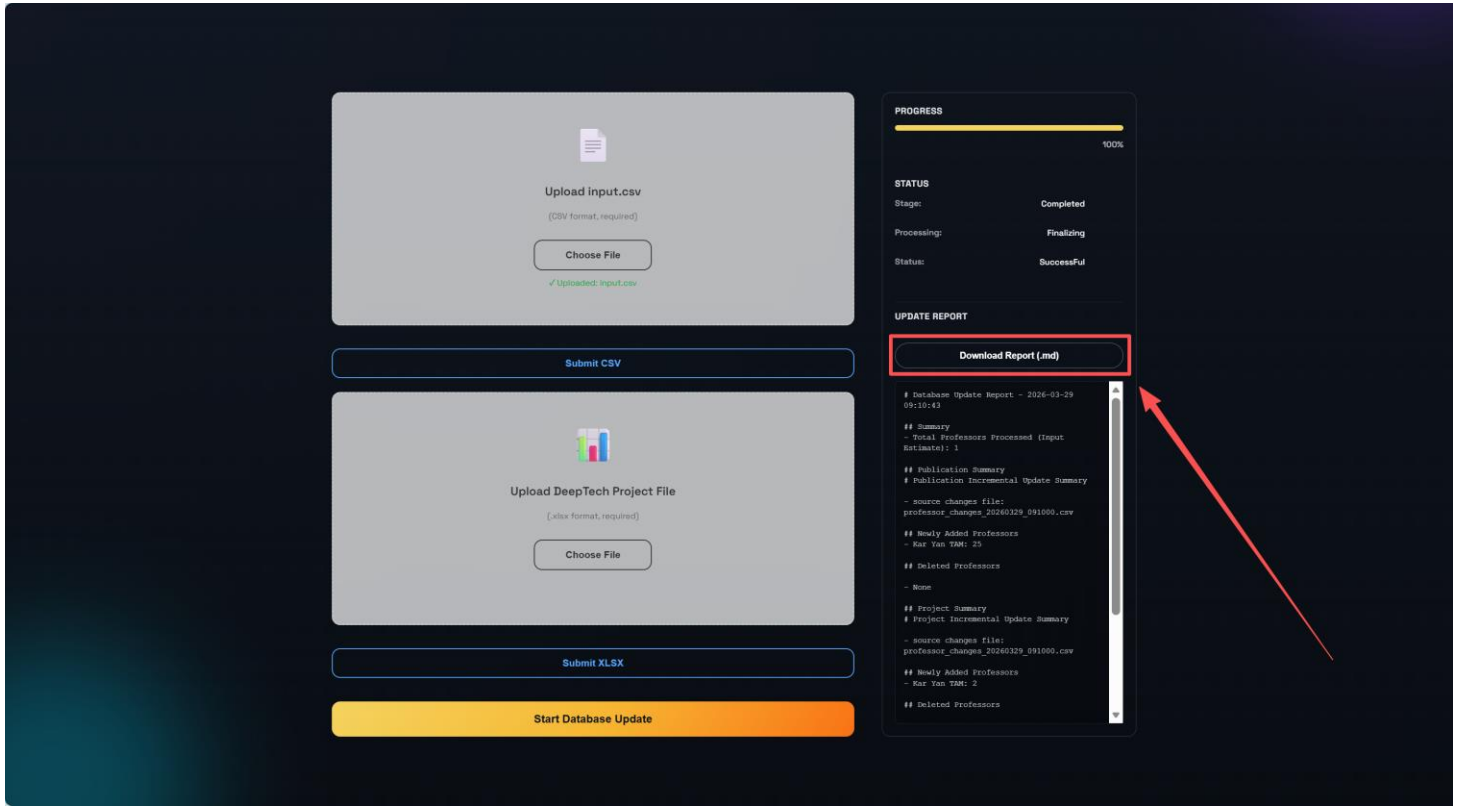
- After you uploading `input.csv`, click the `Start Database Update` button below.

# Step 5: Update the Database



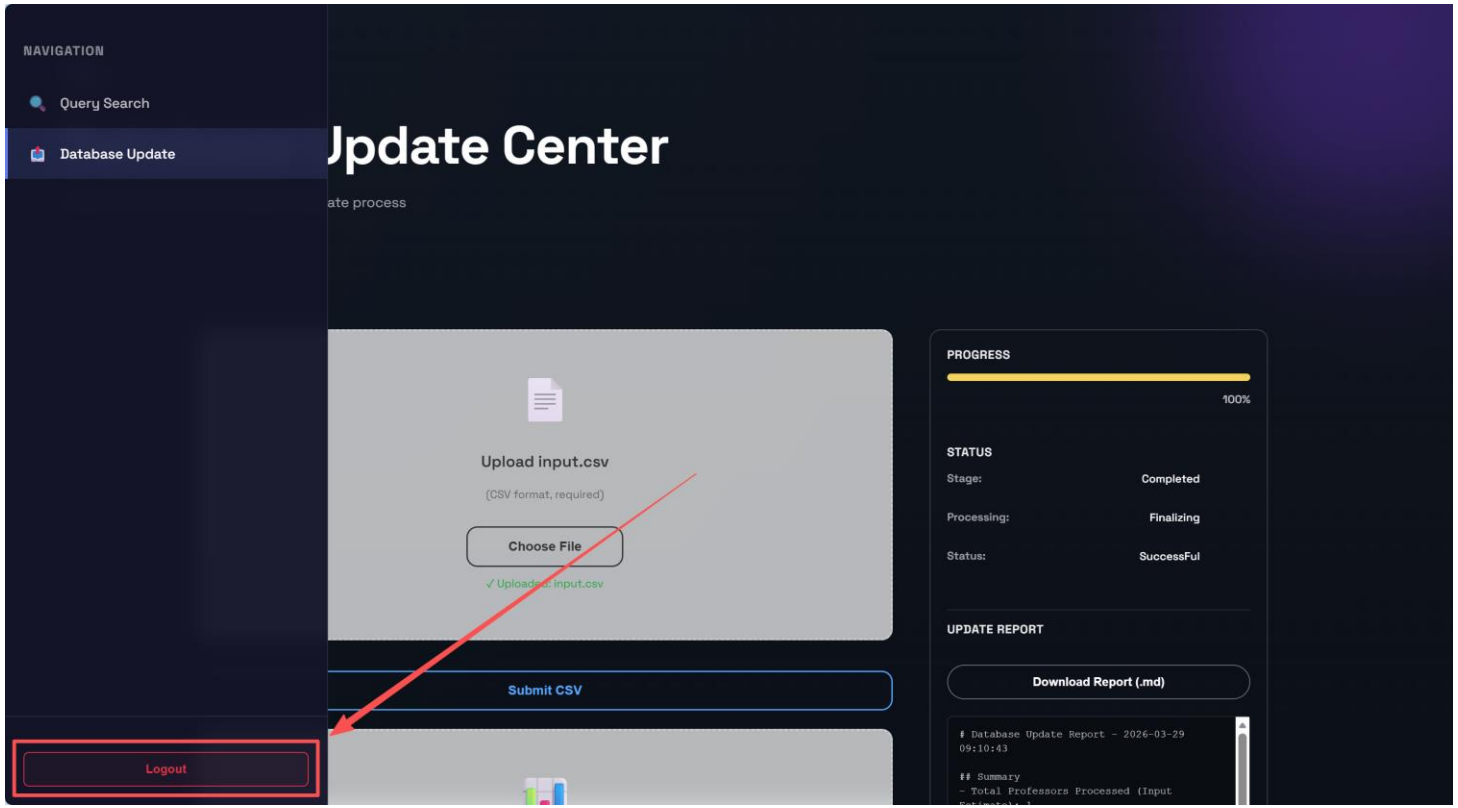
- Waiting the process until completion

# Step 5: Update the Database



- After completion, you can preview the update report and download it to your computer

# Step 5: Update the Database



- You can resubmit another `input.csv` or DeepTech project excel to do multiple updates. After everything complete, remember to log out to avoid your token to be expired

# The End
